

The Bangweulu Circuit

Sat 1 – Sun 9 June 2024

Mutinondo Wilderness,
Lavushi Manda, Bangweulu Wetlands
and Kasanka National Park

Guide: Wouter van Spijker (TBC)

Package type: “Birds & Bush” guided safari: *We’re spending as much time as feasible in wild places, where the focus is on birding while exploring, with ample attention for other wildlife.*

Accommodation type: glamping (3-star)

Participants: minimum 2, maximum 12

Option 1: Self-drive. Join on Saturday 1st June at Mutinondo, up to departure Sunday 9th June 2024 from Kasanka / Option 2: With transport. Collection from Lusaka / airport on Friday 31st May, drop-off on Monday 10^h June 2024

Package price:

(1) Self-drive - Meet on 1st June at Mutinondo / depart 9th June from Kasanka

Fully inclusive: Inclusive of guiding, accommodation, catering, entry fees, activities

Resident / SADC \$ 2,385 pp (sharing)

International \$ 3,340 pp (sharing)

Fully inclusive Own camping gear: Inclusive of guiding, catering, entry fees, activities

Resident / SADC \$ 2,265 pp (sharing)

International \$ 3,220 pp (sharing)

(2) Fly in - Pickup from airport on 31st May, night in Chisamba / depart 10th June after night in Chisamba from airport. Comfortable transport 4x4 whole trip

Fully inclusive with transport: Inclusive of guiding, accommodation, catering, entry fees, activities, transport

Resident / SADC \$ 3,225 pp (sharing)

International \$ 4,260 pp (sharing)

BIRDING ZAMBIA

Web www.birdingzambia.com / email: birdingzambia@gmail.com

Introduction

The Bangweulu area is one of Africa's main protected area complexes with a combined surface of some 2 million hectares. It incorporates the vast Bangweulu Wetlands – one of Africa's largest wetlands - and other ecological jewels like Kasanka and Lavushi Manda National Parks. We will combine a visit to these areas with the nearby well-known private reserve Mutinondo Wilderness. The combined area holds an impressive biodiversity, with well over 500 bird species, some 100 reptiles and 150 mammals recorded. Among many endemics are multiple mammals, at least one reptile and one frog. Our journey will go through an amazingly diverse landscape, from bare rock formations and dense forest, to endless open plains and papyrus-flanked water courses.

This trip is perfect for both fanatic birders and other nature enthusiasts, with the spectacular landscapes and diversity in large mammals forming a marvellous addition to an impressive bird list. Although birds are a prime focus, we will dedicate ample time to other aspects of these amazing areas as well.

Your visit will support BirdWatch Zambia as well as the Mwinilunga Conservancy, Birding Zambia's conservation project of choice.

Site descriptions

Mutinondo Wilderness

This 10,600-hectares private reserve is possibly Zambia's most scenic destination. Massive granite inselbergs tower out above the pristine miombo woodlands, interspersed with crystal-clear streams, orchid-rich *dambo* grasslands and strips of evergreen forest. Mutinondo, recognized as an Important Bird Area, holds a long list of specials. It was here that ornithologists first realized the co-occurrence of two species of Miombo Double-collared Sunbird, now known as Western and Eastern Miombo Sunbird. Anchieta's and Green-headed Sunbird, Ross's Turaco, Grass Owl, Bar-winged Weaver, Laura's Woodland Warbler, White-tailed Elminia, White-tailed Blue Flycatcher, Rufous-bellied Tit, Anchieta's and Whyte's Barbet, Marsh Widow, Bar-throated Apalis, Fawn-breasted Waxbill and Reichard's Seedeater are among the many other specials present.

Although mammal densities are relatively low, the diversity is high, with interesting species like Chequered Giant Sengi, both otters, Klipspringer, Roan Antelope, Eland, Spotted Hyena and Leopard.

Among the rich reptile and amphibian fauna is the fascinating endemic Mutinondo Grass Frog which Frank recently described from the reserve, living on the granite inselbergs. May isn't a great to find these but we just might get lucky.

We will stay at the scenic Nsaka Campsite using our comfortable mobile kit. Please enquire if you're keen to opt for Mutinondo's stunning chalets instead.

Lavushi Manda National Park

This 160,000 hectare wilderness holds fascinating scenery and biodiversity, including a huge diversity of larger mammals. We will traverse the park on the way to Bangweulu, following the main road cutting through a dry section of the park. Although our brief snapshot won't do this rich park any justice, we expect nevertheless to come across a range of interesting birds.

The miombo that flanks the main road can be very productive. During the 2022 Birding Zambia tour, we picked up on, among others, Arnot's Chat, Anchieta's Barbet, Black-necked Eremomela, Spotted Creeper, Yellow-bellied Hyliota and Long-tailed Cisticola.

We will have a lunch stop at Mumbatuta Falls on the Lukulu River. This pretty set of small falls regularly produces interesting birds including Finfoot, Black Duck, Mountain Wagtail, Ross's Turaco and Palm-nut Vulture. Vanilla Orchid is among fascinating flora associated with the falls. A range of large mammals has been encountered here over the years here as well – though luck is required as densities are low.

Bangweulu Wetlands

With a surface of some 1.5 million hectares, this is one of Africa's largest wetlands. The area is best known for the large population of Shoebills and the endemic Black Lechwe. It can further boast to hold another endemic (sub)species of antelope, the Bangweulu Tsessebe, some 15% of the global population of Wattled Crane, healthy populations of vultures, Sitatunga and Oribi, as well as enormous numbers of waterbirds. You'll hardly have a second without seeing birds! Among many specials are Katanga Masked Weaver, Lesser Jacana, Swamp Flycatcher, Blue-breasted Bee-eater, Black Heron, Spur-winged and Long-toed Lapwing, Rosy-throated Longclaw. We expect to see thousands of ducks, egrets, ibises, spoonbills, pelicans and other waterbirds, as well as a great diversity and density of raptors, to name a few, in and near the river channels dotted with Papyrus and waterlilies.

Our key target obviously is the iconic and threatened Shoebill. Local expertise on the whereabouts of the birds will dictate which area(s) we will focus on during a dedicated "Shoebill Expedition". This typically involves a boat ride by banana boat, and may require walking through wet areas and even over floating vegetation.

We will stay at Nsobe Community Campsite, making use of Birding Zambia's mobile camp kit, at the very edge of the vast Chimbwi Plains. Large numbers of Black Lechwe and smaller numbers of Tsessebe are commonly seen from the camp. Collared Pratincole and Kittlitz's Plover are among bird occurring in huge numbers here, while finding specials like Denham's Bustard may require more effort. The adjacent termitaria woodlands host beauties like Black-backed Barbet and White-winged Black Tit, while the rain-fed plains slightly further south hold specials like Blue Quail, Black-rumped Buttonquail, Locust Finch and Fülleborn's Longclaw, plus isolated populations of Long-tailed Widow, Desert Cisticola, Sooty Chat and Rufous-naped Lark. Oribi and Reedbuck are among the ungulates in these parts. Carnivores regularly encountered include Spotted Hyena and Side-striped Jackal. Cheetah was reintroduced to the area in 2021 and may be seen hunting on the plains.

Kasanka National Park

Despite being one of Zambia's smaller national parks, Kasanka is renowned for its biodiversity and rich mosaic of dry and wet habitats. The world-famous migration of some 10 million Straw-coloured Fruit Bats, which occurs between early October and early January, may well be the largest mammal concentration on earth and is frequently stated to be among the world's greatest wildlife spectacles.

With 480 bird species recorded, it has the longest birdlist of all Zambia's parks and Important Bird Areas apart from the massive Kafue N.P. – remarkable considering the small size and lack of variation in elevation. Among the many specials commonly seen are Böhm's Bee-eater, Ross's Turaco, Purple-throated Cuckooshrike, a wide range of waterbirds including the occasional Shoebill, and many miombo woodland specials such as Black-necked Eremomela.

The ever-growing mammal list stands at some 130 species. This park offers possibly the world's best Sitatunga viewing and a large population of Puku, while we are likely to see specials like Rump-spotted ("Blue") Monkey and Kinda Baboon in addition to megafauna such as Elephant and Hippopotamus.

Detailed program

Day 1 (31st May 2024)

Collection of participants from Lusaka International Airport or elsewhere in Lusaka. Time-dependent, we will be birding along the road to Chisamba, including a reliable site for the endemic Chaplin's Barbet. Overnight in Birding Zambia's private guesthouse (2 rooms – on a first-come basis) or Fringilla Lodge.

Day 2 (1st June 2024)

Early start (5:00) from Chisamba. It takes approximately 10 hours to reach Mutinondo Wilderness, including some brief scheduled stops along the way. Lunch will be at Forest Inn. Time allowing, we will tie in some roadside stops expecting to see a good mixture of typical Zambian birds to warm up with.

Self-drive participants coming from e.g. Copperbelt may want to join up at Forest Inn at midday.

Arrival at Mutinondo Wilderness late afternoon, where we will set up camp on the scenic campsites.

Day 3 and 4 (2nd and 3rd June 2024)

Two full days of exploring Mutinondo Wilderness. We will get an excellent impression of the wide variety of habitats and accompanying birds, including the streams and rapids, miombo woodlands, wet evergreen forest, open dambo grasslands and rocky habitats. Not only does the area offer great birding, but also the choice between walking and driving, and even canoeing and swimming – all great ways to enjoy the wilderness. And not to forget the many sites for unforgettable birding-and-sundowner combo's!

Day 5 (4th June 2024)

We'll aim for a timely start from Mutinondo, heading towards Lavushi Manda N.P. It will take 3-4 hours from Mutinondo to Mumbatuta Falls, depending on bird activity along the way. We'll have a couple of hours to enjoy the rapids, birds and a lunch at Mumbatuta. Another 3 hours on dusty

roads will be needed to reach Nsobe Campsite in the Bangweulu Wetlands, where we'll use the rest of the afternoon to set up camp and enjoy the bird and mammal rich surroundings.

Day 6 and 7 (5th and 6th June 2024)

Two full days to explore the Bangweulu Wetlands. We'll incorporate a "Shoebill Expedition", an additional birding session by boat, and several drives and (optionally) walks to ensure we cover all major birding and wildlife habitats in the area.

Day 8 (7th June 2024)

Early morning birding and breakfast around Nsobe Campsite, after which we embark on our 6-hour journey to Kasanka National Park. Along the way we will stop at the scenic Lake Waka Waka for lunch. We expect to check in at Pontoon Campsite in good time to settle in and do some birding.

Day 9 (8th June 2024)

Full day to explore Kasanka. We will do our best to get a good impression of all that this park has on offer within our relatively limited time here. Pontoon is the best area to see the secretive Sitatunga, at first light, while a long list of bird specials are often seen here, including Pel's Fishing Owl and Böhm's Bee-eater. From here, we will continue to explore the Kasanka Floodplains and adjacent woodlands, up to Bufumu Forest – an amazing jewel including Zambia's tallest known tree and the magical *mateshe* dry evergreen forest – where we will have lunch. The afternoon drive passes by the Bat Forest – home to the world famous colony of Straw-coloured Fruit Bats in Oct-Dec, as well as resident groups of Kinda Baboon, Rump-spotted ("Blue") Monkey and Malbrouck's Monkey, and a wide range of birds.

Day 10 (9th June 2024)

After an early breakfast, we will make our way back towards the gate, with likely some excellent birds as we go. It is approximately 7 hours (500 km) from the entrance gate to Lusaka, or some 6 hours to Ndola and Kitwe.

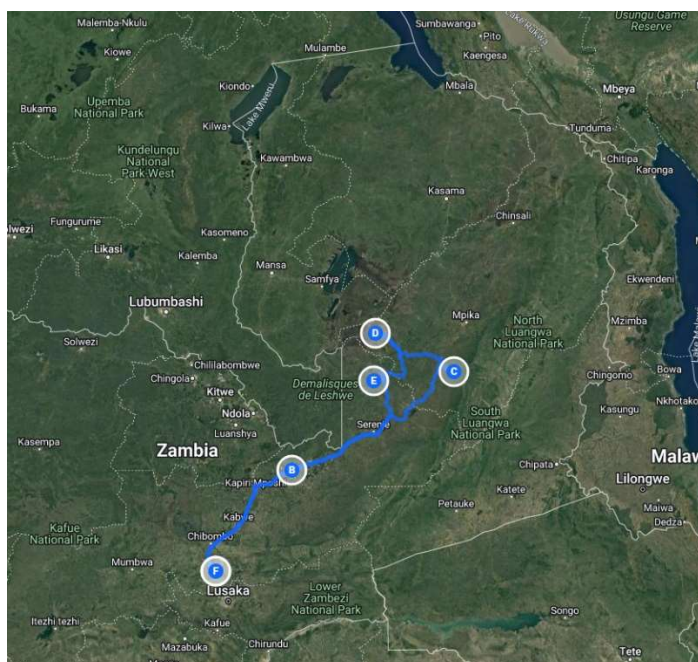

Self-drive visitors will go their own way from here, fly-in visitors will overnight at Birding Zambia's private cottage or at Fringilla Lodge.

Day 11

Fly-in visitors will get an early morning transfer to the airport.

Map of the route

Map of the route, starting from and ending at Chisamba, 40 km north of Lusaka city / airport

- A: Birding Zambia / Fringilla Lodge
- B: Forest Inn
- C: Mutinondo Wilderness
- D: Nsobe Campsite – Bangweulu Wetlands
- E: Kasanka National Park

The roundtrip to and from Lusaka is approximately 1450 km – excluding movements within the reserves.

Suggested flights

If flying from Johannesburg, we suggest the following ProFlight option:

Friday 31st May	ProFlight	JHB	LUN	
		14:00		16:00
Monday 10 June	ProFlight	LUN	JHB	
		11:00		13:00
